

VP-110 Vacuum Pump

The vacuum pump VP-110 is intended to ensure continuous air intake to a volume activity monitor.

The unit serves primarily CPM-310 Continuous Particulate Monitor.

Purpose

The vacuum pump is intended to ensure stable and continuous air intake to a volume activity monitor. The unit serves primarily the CPM-310 Continuous Particulate Monitor.

Description

The vacuum pump is of the vane type, oil less model, motor mounted (integrated), rugged construction. It provides pulse-free airflow.

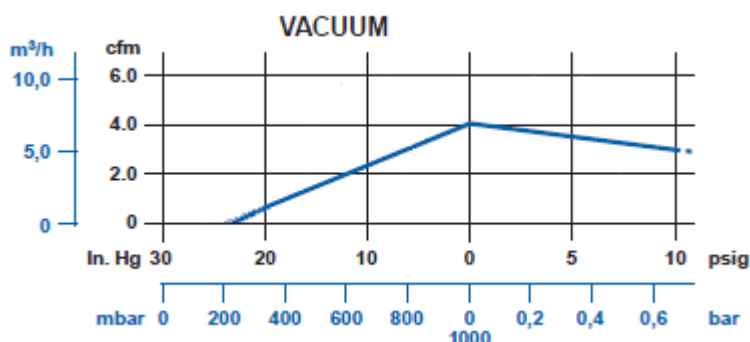

The airflow can be adjusted via reducing screw.

Specifications

Airflow max. (free)	6.8 m ³ /h (4.0 cfm)
Power supply	110-120/220-240 VAC, 50/60 Hz
Consumption	190 W (1/4 hp)
Protection	IP45
Operating temperature	0 ~ 40 °C (32 ~ 104 °F)
Weight	14.4 kg (32 lb)
